

IDROBENNE®

The grab expert.

Product Catalogue

Edition n. 16

Profilo aziendale

La Idrobenne progetta, produce e commercializza accessori idraulici di presa per gru da camion ed escavatori idraulici. Presente sul mercato col proprio marchio dai primi anni '90, l'impresa oggi collabora con i più prestigiosi marchi di gru idrauliche e di escavatori, forte della sua indipendenza e dell'esperienza maturata nella propria nicchia di mercato. La Idrobenne può essere considerata un vero "Grab expert", capace di suggerire la migliore risposta alle più diverse esigenze di movimentazione.

La Sede

L'azienda è situata a Isorella, in provincia di Brescia, in un distretto industriale tra i più famosi d'Europa per la produzione metalmeccanica e siderurgica. La Idrobenne ha operato una precisa scelta di qualità e di radicamento nel tessuto produttivo italiano. Per questo non delocalizza la produzione di nessun componente. Tutte le lavorazioni sono effettuate all'interno del proprio stabilimento, al fine di avere un controllo di qualità immediato e costante.

I clienti

La Idrobenne esporta direttamente i propri prodotti in più di 40 Paesi. La missione aziendale è di fornire prodotti tecnologicamente avanzati e affidabili ad una clientela professionale. Per questo il nome Idrobenne è riconosciuto come un marchio di qualità.

I fornitori

I maggiori fornitori della Idrobenne sono selezionatissimi e legati da un rapporto di collaborazione aperto e costruttivo che dura da oltre un decennio. E' infatti innegabile che sia necessario investire nelle fonti di approvvigionamento per offrire un prodotto di alta qualità. I fornitori Idrobenne sono considerati i primi *partners* dell'azienda. I più importanti hanno sede in Italia settentrionale, in Germania e in Svezia.

Company profile

Idrobenne has been manufacturing quality hydraulic grapples for truck cranes and excavators since the early Nineties. Company's own experienced staff carries out all design, engineering, production and final testing. The Company is totally independent from any crane and excavator manufacturer. These factors have helped Idrobenne gain recognition as a leading "Grab expert" throughout the truck crane and excavator attachment industry.

The headquarters.

The Company is located in Northern Italy, near Brescia, where some of the most important European steel companies were born. To ensure highest quality standards, Idrobenne manufactures every component internally, where trained personnel monitor each process. State-of-the-art computer engineering software combines with the most advanced processing machinery for precision parts, in a clean and friendly working environment.

Customers.

Idrobenne deals directly with more than 40 Countries all over the world. Company mission is to supply good quality products to professional and demanding clients. Idrobenne cares about the reliability of its products even in the worst working conditions.

Supplier's policy.

Idrobenne believes suppliers are key partners to its production of quality and innovative products. All main suppliers have been through a long selection process, but now they work as a team with the Company and share the same mission. Some raw materials and components are imported from Germany and Sweden.

Qualità

Per ottenere un prodotto di elevata qualità, l'intero processo costruttivo deve lavorare al meglio. In altre parole, la qualità finale di un prodotto è funzione del livello di qualità di ogni singolo processo che porta al risultato finale.

I nostri punti di forza:

- Software di progettazione e disegno tridimensionale di ultima generazione, costantemente aggiornato
- Sistema di prototipazione virtuale con analisi degli stress e dei fenomeni di fatica
- Materiali di costruzione selezionati e certificati all'origine
- Componentistica di qualità superiore, di produzione esclusivamente europea
- Sistemi oleodinamici provenienti esclusivamente da fornitori certificati ISO 9001
- Personale di grande esperienza qualificato secondo gli standard professionali AWS per le lavorazioni speciali
- Moderne isole di saldatura robotizzata Kawasaki e FANUC
- Consulenti commerciali disponibili e tecnicamente preparati
- Accurato controllo dei processi
- Documentazione di prodotto completa e aggiornata
- Sistemi ed attrezzature progettati per la sostenibilità ambientale secondo ISO 14001
- Severo collaudo di tutti i prodotti prima della spedizione
- Controllo di gestione e monitoraggio continuo della soddisfazione dei clienti

ISO 9001:2000

Il sistema di qualità Idrobenne è certificato ai sensi della normativa ISO 9001:2000 per la progettazione, costruzione, commercializzazione, assistenza di polipi ed attrezzature idrauliche per escavatori e gru da camion.

Il processo industriale è quindi organizzato, condotto e controllato in ogni sua fase: dall'ideazione del prodotto alla realizzazione dei diversi componenti che lo costituiscono fino alla verifica della sua perfetta funzionalità.

Quality

It is widely acknowledged that proper quality management improves business, often having a positive effect on investment, market share, sales growth, sales margins, competitive advantage, and avoidance of litigation.

Strengths

- *State of the art, constantly updated 3D drawing software*
- *3D virtual prototype system, to simulate the reactions of new equipment to the most various working conditions*
- *Carefully selected and certified materials*
- *High quality components, all strictly made in Europe.*
- *Top quality hydraulic components, coming from certified suppliers only*
- *Highly trained workers, kept constantly updated by welding and mechanics courses, AWS certified for metal assembly and constructions*
- *State of the art robot welding facilities, by KAWASAKI and FANUC*
- *Customer oriented, very professional commercial staff*
- *Step by step process controlling*
- *Accurate product documentation and user friendly operating manuals*
- *Environmental policy (ISO 14.000 Certified)*
- *Severe product testing before shipping*
- *Constantly updated customers' satisfaction reports*

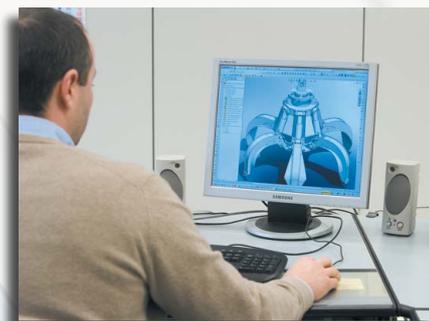

ISO 9001:2000

Idrobenne is ISO 9001:2000 certified in design, construction, commercialisation, servicing of hydraulic grabs and equipment for excavators and truck cranes.

Industrial process is organized, managed and verified at any stage: from product design, to component assembly, to the severe performance testing

Together with manufacturing process we care and constantly improve customer servicing, technical support, up to date technical documentation and immediate spare parts supply.

Our qualified workers are regularly trained to the newest welding, assembly and testing techniques. Incoming materials and components are regularly checked.

Sono inoltre attivate e costantemente migliorate le funzioni di supporto come l'assistenza al cliente, la redazione e l'aggiornamento della documentazione tecnica, la puntuale fornitura dei pezzi di ricambio.

Le maestranze qualificate partecipano regolarmente a corsi di aggiornamento sulle tecniche di saldatura, assemblaggio e collaudo, sulle lavorazioni meccaniche di precisione, sul controllo della qualità in ingresso ed in uscita dal proprio reparto. È stato avviato, strutturato e incoraggiato il sistema per il miglioramento continuo di processo e prodotto.

ISO 14001:2004

La Idrobenne, unica azienda del settore in Italia, ha ottenuto la certificazione ISO 14001:2004 per avere implementato un sistema di gestione teso a minimizzare l'impatto ambientale dei processi e dei prodotti e per avere investito cospicue risorse in favore dell'eco-sostenibilità.

Il Sole primo fornitore di energia

L'azienda, tra le prime in Italia, si è dotata di un impianto fotovoltaico da 150 Kw, integrato nell'edificio della Sede di Isorella, che contribuisce a circa la metà del fabbisogno energetico interno. Anche per questo siamo orgogliosi di affermare che le nostre attrezzature sono veramente ecologiche!

Impegno costante e concreto

L'attenzione della Idrobenne per le problematiche ambientali deriva dal settore principale di attività in cui l'azienda opera, che consiste nella raccolta differenziata di rottami e rifiuti solidi urbani. Lo sforzo della Idrobenne verso uno sviluppo sostenibile non si ferma tuttavia al dato formale, ma coinvolge la sostanza della *Company Mission*.

Certificarsi ISO 14000:2004 significa:

- Aggiornare e mantenere costantemente macchinari ed impianti in modo da diminuire l'utilizzo delle risorse naturali quali aria, acqua, energia
- Attivare uno stretto controllo sui processi potenzialmente dannosi per l'ambiente
- Ridurre al minimo indispensabile gli scarti di lavorazione, l'utilizzo di prodotti tossici e le emissioni in atmosfera, nei corpi idrici, l'inquinamento acustico
- Eliminare dal ciclo produttivo le lavorazioni fortemente inquinanti mediante l'uso di procedimenti alternativi a ridotto impatto ambientale
- Prepararsi a gestire le situazioni di pericolo ed emergenza mediante il continuo addestramento degli operatori.

Step by step process improvement is promoted and rewarded at any level.

ISO 14001

Idrobenne is the first Italian Company to achieve ISO 14000:2004 certification in its field, having set up a management system to reduce environmental impact of products and manufacturing processes and invested a relevant amount of money to reduce carbon pollution.

Solar power

The most important element confirming Idrobenne's commitment on environmental policy has been the installation of a 150 Kw solar PowerStation on the top of its headquarters in Isorella. So, nearly a half of the energy used for the production comes from the cleanest and most renewable of the power sources. This allows Idrobenne to say that its products are really environmental-oriented!

Constant commitment

Idrobenne's attention and commitment for the natural environment is part of the Company mission. In fact, orange peel grapples and sorting grabs are used in the recycling sites, where the attention for the re-use of parts and materials is essential.

ISO 14000 registration means:

- Constantly maintain machinery and production facility to reduce dissipation of natural resources as air, water, energy
- Carefully monitor potentially environment-harming processes
- Reduce to the lowest production residue, the use of toxic substances and any pollution to air, ground, water
- Eliminate from manufacturing cycle any polluting process, by adopting less-impact methods
- Train personnel to face environmental emergencies like air, ground or water pollution, fire, poisonous leakages.

Orange peel grabs

- Compact 6-7
- Heavy duty compact 8-9
- With vertical cylinders 10
- Heavy duty with vertical cylinders 11

Sorting and demolition grapples 12-13

Clamshell buckets

- With horizontal cylinders 14-17
- With vertical cylinders 18-19

Log grapple 20-21

Multi-purpose forestry grapples 22-24

Kerb stone grabs 25

Pallet forks 26

Wallboard forks 27

Railway equipment

- Grabs for sleepers 28
- Grabs for rails 29
- Propping grab 30

Orange peel grapples for rocks 31

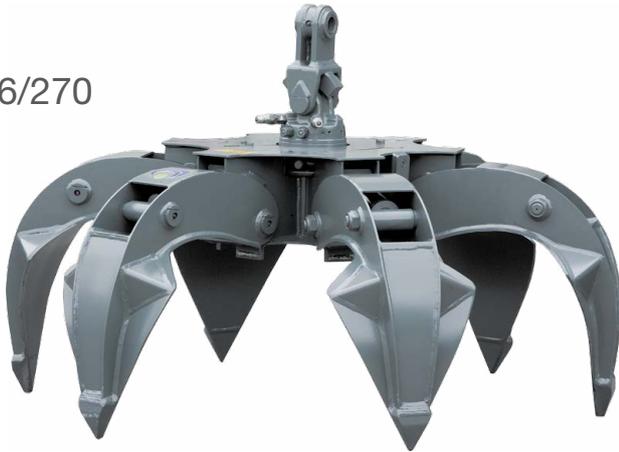

Hydraulic rotators 32

Cross-reference listing grapple / operating machine 34

Compact orange peel grab for metal scrap and loose materials.

Technical Data

Accessories

GRM 4 T	Mechanical, free 250° rotation (without hydraulic supply)
GRI 4 T/S	Hydraulic rotator from PFO 5/100 until PFO 4/180
GRI 5 T/S	Hydraulic rotator for mod. PFO 5/220
GRI 5 T/SF	Hydraulic rotator from mod. PFO 5/250 until PFO 6/320
GRI 11 T/SF	Hydraulic rotator for mod. PFO 5/400 and PFO 6/400
Top link for crane	Cardan suspension link for truck crane
Top link for excavator	Cardan suspension link for excavator
-SR	Heavy-duty, reinforced version available on demand.

3 different tine shapes available: open, semi-closed (standard), closed.

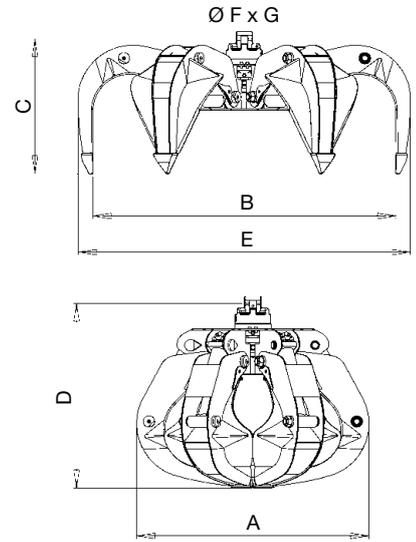

Orange peel grab for foldable truck cranes

- Compact and sturdy design, generous load capacity.
- The hydraulic circuit is perfectly protected into the structure.
- Incorporated hydraulic or mechanical rotation.
- Jaws are made of HB 400 anti-wear steel, tips are forged.

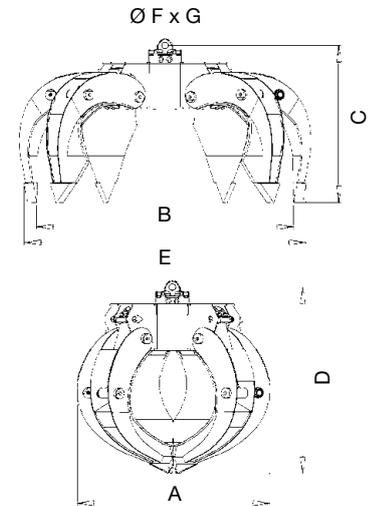

PFO-6/280

PFO-6/290

Asymmetric version for "Z" cranes:

Model	Jaws n.	Cap. l.	Weight Kg	Max load DaN	Max BAR	A mm	B mm	C mm	D mm	E mm	Ø F x G mm
PFO - 6/290	6	290	410	3000	220	1050	1500	750	920	1650	32x80

Accessories

GRM 4 T	Mechanical, free 250° rotation (without hydraulic supply)
GRI 5 T/SF	Hydraulic rotator
Top link for crane	Cardan suspension link for truck crane
-SR	Heavy-duty, reinforced version available on demand.

3 different tine shapes available: open, semi-closed (standard), closed.

Compact polyp grab for excavators up to 18 Ton

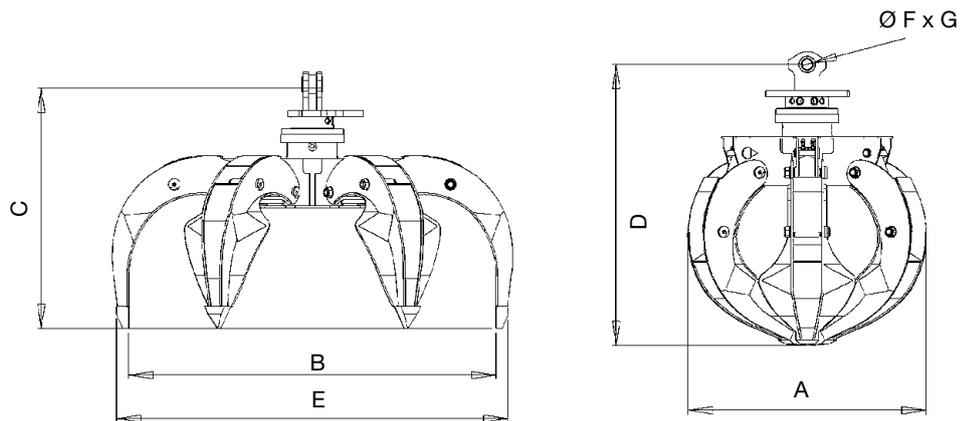

- Reduced overall dimensions to operate in confined spaces
- Jaws and tips are made of HB 400 anti-wear steel.
- Hydraulic circuit is fully protected into the structure.
- Solid tine stops protect cylinders from shock loads.

PFO-5/400 SR

Model	Jaws n.	Cap. l.	Weight Kg	Max load DaN	Max BAR	A mm	B mm	C mm	D mm	E mm	Ø F x G mm
PFO - 5/400-SR	5	400	600	3000	300	1250	1860	1150	1350	2010	50x100
PFO - 6/400-SR	6	400	650	3000	300	1250	1860	1150	1350	2010	50x100

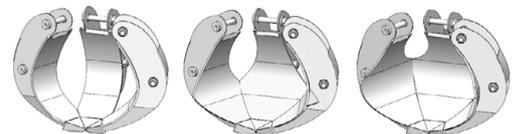

Technical Data

Accessories

GRM 6 T	Mechanical, free 250° rotation (without hydraulic supply)
GRI 10 T/P	Hydraulic rotator
Top link for excavator	Cardan suspension link for excavator

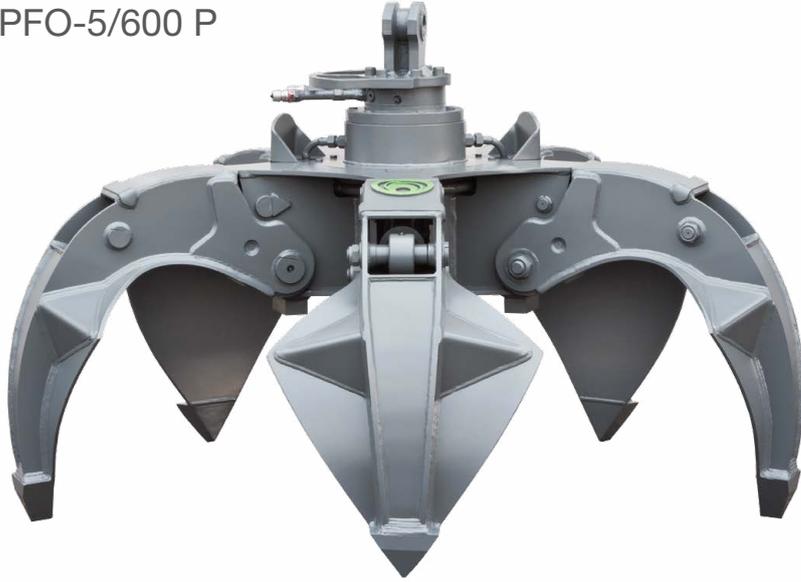

3 different tine shapes available: open, semi-closed (standard), closed.

Compact orange peel grapple for midi-excavators

- The best solution to work indoors or to operate in confined spaces.
- Long tested in the hardest working conditions on site.
- Jaws and tips are made of HB 400 anti-wear steel.
- Very interesting value for money.

PFO-5/600 P

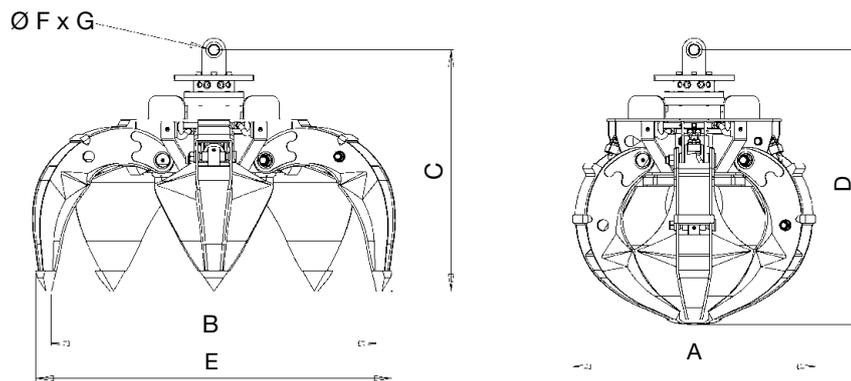

PFO-6/600 P

Model	Jaws n.	Cap. l.	Weight Kg	Max load DaN	Max BAR	A mm	B mm	C mm	D mm	E mm	Ø F x G mm

Technical Data

Accessori

GRM 10 T	Mechanical, free 250° rotation (without hydraulic supply)
GRI 10 T/P	Hydraulic rotator
Top link for excavator	Cardan suspension link for excavator
Cylinder protection	Protections for hydraulic cylinder

3 different tine shapes available: open, semi-closed (standard), closed.

Orange peel grab with vertical cylinders

- Traditional and very reliable design, made of 420 DOMEX steel.
- Easy maintenance operations.
- The best solution for the job in tanneries
- Jaws are made of HB 400 anti-wear steel, tips are forged.

PFV-6/360

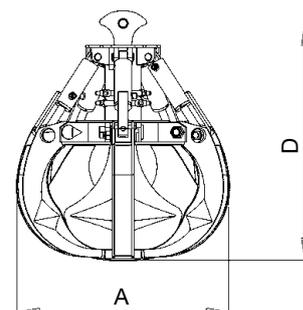

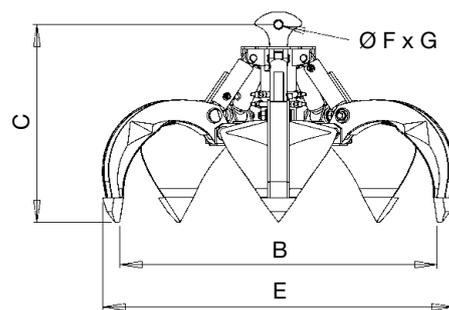

PFV-6/250

Model	Jaws n.	Cap. l.	Weight Kg	Max load DaN	Max BAR	A mm	B mm	C mm	D mm	E mm	Ø F x G mm

Accessories

GRM 4 T	Mechanical, free 250° rotation (without hydraulic supply)
GRI 4 T/S	Hydraulic rotator for mod. PFV 5/150
GRI 5 T/SF	Hydraulic rotator
Top link for crane	Cardan suspension link for truck crane
Tannery kit	Spherical tips and round jaw edges to protect leather from cuts

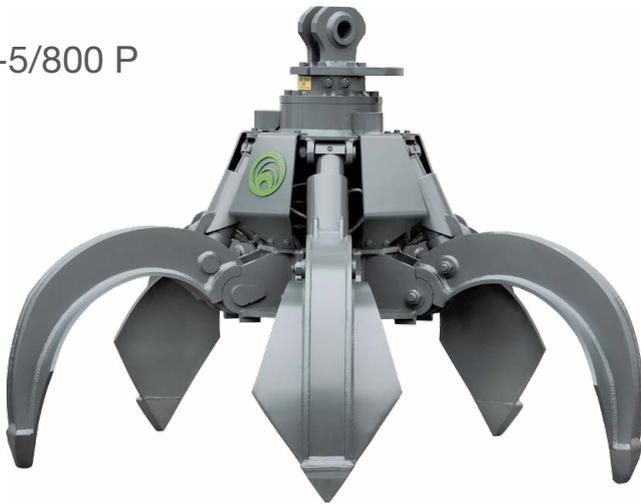

3 different tine shapes available: open, semi-closed (standard), closed.

Orange peel grapple with vertical cylinders for excavators.

- Very sturdy structure, made of high strength fine grain steel.
- 5 or 6 tine version available for each capacity.
- Very powerful cylinders with ball-joints and solid ends-of run
- Tips and jaws are entirely made of HB 400 anti-wear steel.

PFV-5/800 P

Technical Data

Accessories

GRM 10 T	Mechanical, free 250° rotation (without hydraulic supply)
GRI 10 T/P	Hydraulic rotator for excavators up to 23 Ton
GRI 20 T/P	Hydraulic rotator for excavator of 24 Ton and over
Attacco per escavatore	Cardan suspension link for excavator

3 different tine shapes available: open, semi-closed (standard), closed.

Sorting grab (universalgrab)

- Compact and simple design makes servicing very easy.
- Rigid mounting is allowed by the flat top rotator.
- Replaceable cutting edges made of HB 400 steel grant maximum durability.
- Safety valve, fitted as standard, guarantees secure retention of load

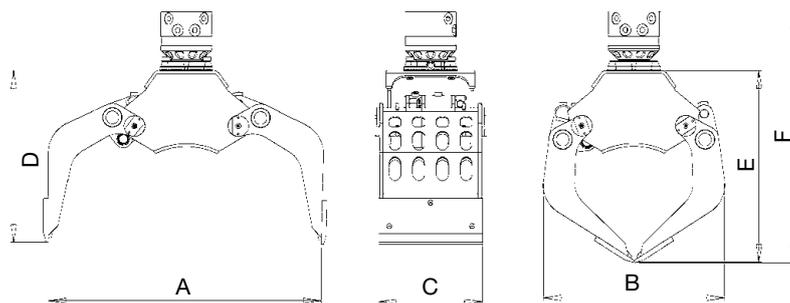

SG 25

SG 50

Technical Data

Accessories	
Adapter	Bolted adapter for rigid mounting

2 versions available: "Sorting", with perforated shells, and "Universal", with closed shells and teeth

Demolition and sorting grapples

- High closing force is granted by the generously dimensioned hydraulic cylinder.
- Compact and simple design, easy servicing.
- Over-dimensioned ends-of-run transfer shocks to the solid main frame and preserve cylinder
- Replaceable cutting edges made of HB 400 steel grant maximum durability.

Accessories

Fixed head	Bolted head (without rotation)
GRM 4 T/F	Mechanical, free 250° rotation (without hydraulic supply)
GRI 4 T/SF	Hydraulic rotator
Teeth	Digging teeth, bolted
Top link for crane	Cardan suspension link for truck crane
Top link for excavator	Cardan suspension link for excavator

Clamshell bucket with horizontal cylinder

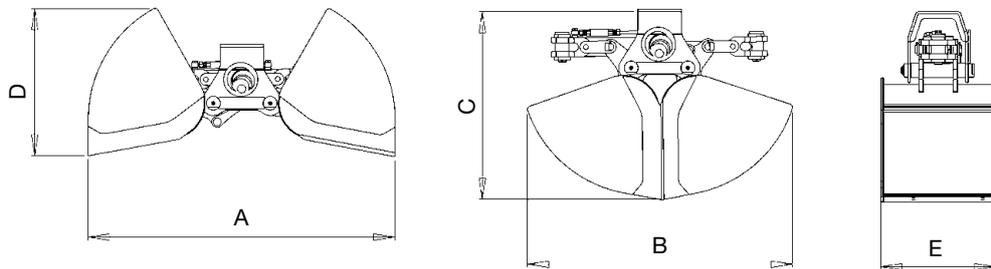

- Sturdy, reliable and compact design.
- Suitable for light digging.
- Hydraulic or mechanical rotation available on demand.
- Cutting edges made of ITAR 7 anti-wear steel.

GRI 5 T/SF	Hydraulic rotator
Teeth	Digging teeth, bolted
Top link for crane	Cardan suspension link for truck crane
Top link for excavator	Cardan suspension link for excavator

Clamshell bucket with two horizontal cylinders for loading

- Sturdy, reliable and compact design.
- Shape of the shells and high penetration force grant excellent loading capacity.
- Suitable for excavator up to 26 Ton.
- Cutting edges made of anti-wear steel, teeth available on demand.

BMO-1200/P2

Technical Data

Accessories	
Fixed head	Bolted head (without rotation)
GRM 10 T/F	Mechanical, free 250° rotation (without hydraulic supply)
GRI 10 T/P	Hydraulic rotator for excavators up to 23 Ton
GRI 20 T/P	Hydraulic rotator for excavator of 24 Ton and over
Teeth	Digging teeth, bolted
Extension	Extensions up to 3 metres of length
Top link for excavator	Cardan suspension link for excavator

Clamshell bucket with two vertical cylinders, suitable for digging

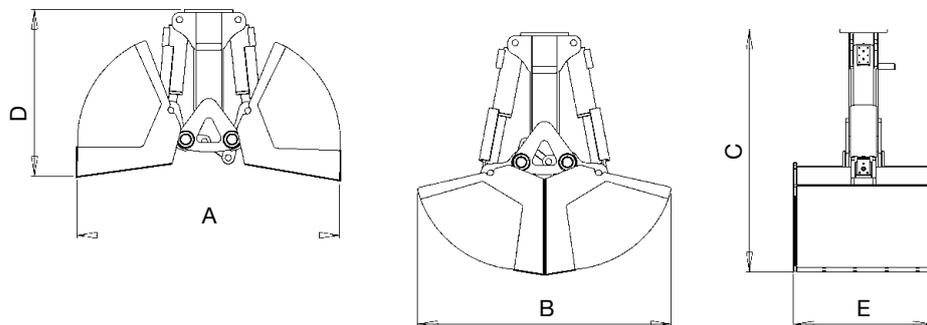

- Cylinders geometry grants very good digging capabilities.
- Sturdy and reliable design.
- Hydraulic or mechanical rotation available on demand.
- Cutting edges made of ITAR 7 anti-wear steel.

BMV-2/350

Model	Cap. l.	Weight Kg	Max load DaN	Max BAR	A mm	B mm	C mm	D mm	E mm

Top link for crane	Cardan suspension link for truck crane
Top link for excavator	Cardan suspension link for excavator

Clamshell bucket with two vertical cylinders, suitable for loading and digging

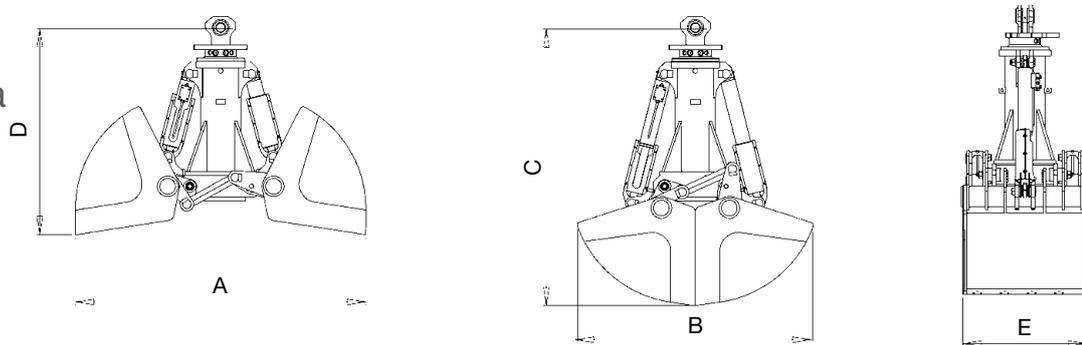

- Geometry of the 2 powerful cylinders grants huge penetration force.
- Robust construction makes it suitable for the most demanding applications.
- Suggested for excavator up to 32 Ton.
- Buckets made of HB 400 anti-wear steel, teeth available on demand.

GRI 10 T/P	Hydraulic rotator per mod. fino a 500 lt.
GRI 20 T/P	Hydraulic rotator per mod. da 1000 lt. e oltre
Teeth	Digging teeth, bolted
Extension	Extensions up to 3 metres of length
Top link for excavator	Cardan suspension link for excavator

Light-type log grapple

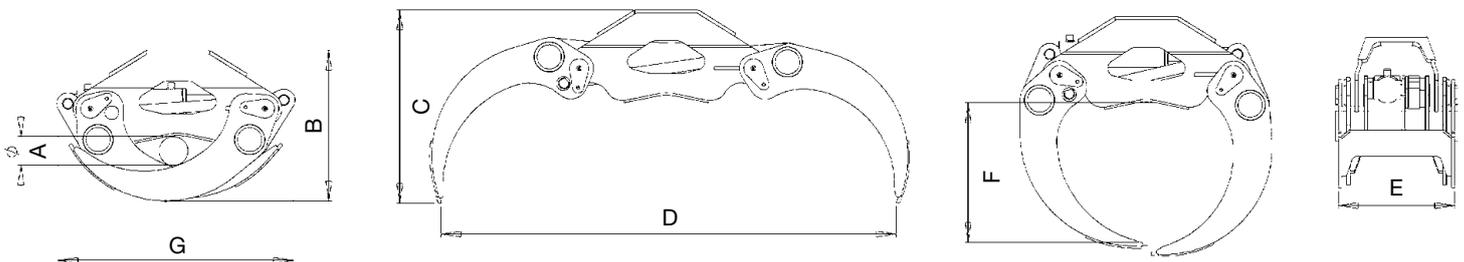

- Light grapple, suitable for not intense applications.
- Wide opening and very small gripping diameter when closed
- Safety valve is fitted as standard.
- Alloy steel pins and hardened bushings in all junctions.
- Entirely made of anti-yield DOMEX 420 steel.

PTO 150

GRI 4 T/SF	Hydraulic rotator
Top link for crane	Cardan suspension link for truck crane
Top link for excavator	Cardan suspension link for excavator

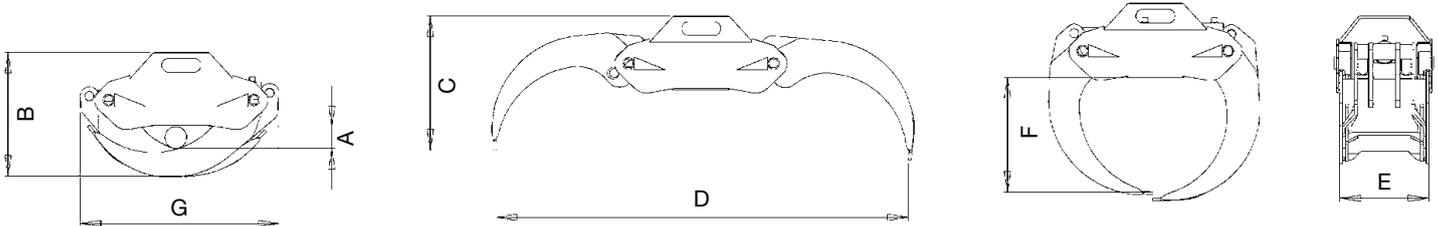

Professional log grapple

- Suitable for intense and industrial forestry applications.
- Wide opening with reduced overall dimensions when closed.
- Central cylinder and double compensation bar design gives a perfect balancing.
- Entirely made of DOMEX 420 and HB 400 steel.

Top link for crane	Cardan suspension link for truck crane
Top link for excavator	Cardan suspension link for excavator

Multi purpose and forestry grab

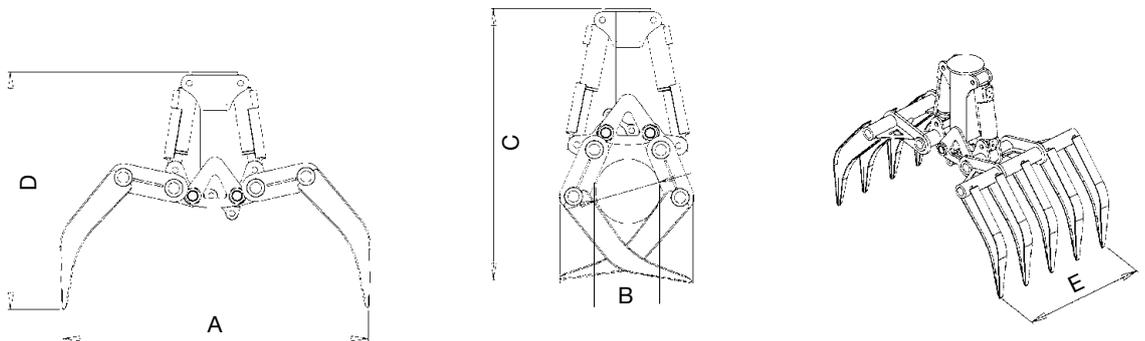

- Very versatile grab with interlocking jaws.
- Vertical - double - cylinders geometry grants high gripping force.
- Sturdy and well-tested main frame, suitable for heavy-duty applications.
- Arms made in HARDOX 400 steel.

FMV-600

Model	Cap. l.	Weight Kg	Max load DaN	Max BAR	A mm	Ø B mm	C mm	D mm	E mm

GRI 5 T/SF	Hydraulic rotator
Top link for crane	Cardan suspension link for truck crane
Top link for excavator	Cardan suspension link for excavator

Grapple for forestry and agricultural applications

- Horizontal cylinder design grants reduced overall dimensions.
- Safety valve fitted as standard.
- Alloy steel pins and hardened bushings are used in all junction points.
- Forged tips for longer durability.

Kerb stone grab

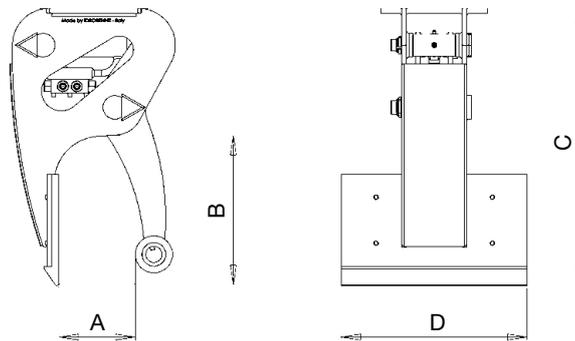

- Handles kerb stones in full security.
- Grabs the kerb directly from the pallet where it is packed.
- Compact, light and very reliable construction.
- Long-lasting nylon pad and plastic bumpers prevent from scratching.
- Kerb stones can be posed at once by the machine operator.
